

ARBORIST CONSULTING SERVICES

Did you know that Trees add more value to your landscape than any other element?

Here is how we protect your Assets:

General Tree Assessments & Care Recommendations

- Analysis of health, structure, pruning needs, infrastructure conflicts
- Pest and disease diagnostics, treatment recommendations
- Holistic Tree Care (HTC) Program: monthly, quarterly, semi-annual, or annual assessments and care recommendations

Tree Risk Assessments

- Determining the targets and target zone for the tree or branches of concern
- Reviewing the site history and conditions, and species failure profile
- Analyzing data to determine the likelihood and consequences of failure, evaluate the degree of risk
- Develop mitigation options and estimate residual risk for each option
- Develop and submit the tree risk assessment and documentation which may include advice on re-inspection intervals
- Level 3 resistograph and sonic tomography testing

Tree Inventories and Tree Health Analysis

- A GIS map of all trees
- Data collection includes but is not limited to species, ID#, health rating (%), height (range), trunk diameter, notes on structural defects, pruning needs, pest and disease issues, infrastructure conflicts, etc.

Management Plans / RFP & Bid Process

- Tree management plans
- Development of pruning scope
- RFP Development

Pre-Construction Tree Protection Plans / Construction Observation

- Assess potential damage to trees located where construction is planned
- Develop specific recommendations to mitigate likely damage to trees
